INDEX OF AUTHORS VOLUME 9

A

ALDRICH, H. C., GRACEN, V. E., YORK, D., EARLE, E. D. and YODER, O. C. Ultrastructural effects of *Helminthosporium maydis* Race T toxin on mitochondria of corn roots and protoplasts 167

ALLEN, T., BAERWALD, R. and POTTER, L. T. Postsynaptic membranes in the electric tissue of *Narcine*: II. A freeze-fracture study of nicotinic receptor molecules 595

ALLEN, T. and POTTER, L. T. Postsynaptic membranes in the electric tissue of *Narcine*: III. Isolation and characterization 609

AUMONT, M. C. *See* NAG, FISCHMAN, AUMONT and ZAK 419

B

BACCETTI, B. and DALLAI, R. The spermatozoon of Onychophorans. 2. *Peripatoides leuckarti* 563

BAERWALD, R. *See* ALLEN, BAERWALD and POTTER 595

BALL, E. E. Fine structure of the compound eyes of the midwater amphipod *Phronima* in relation to behavior and habitat 521

BARBA, W. P. *See* BENOS, KIRK, BARBA and GOLDNER 11

BARRATT, G. F., NADAKAVUKAREN, M. J. and FREHN, J. L. Effect of melatonin implants on gonadal weights and pineal gland fine structure of the golden hamster 335

BAYER, R. C. *See* CUPRAK, LAMMI and BAYER 667

BELL, R. A. *See* BORG and BELL 567

BENOS, D. J., KIRK, R. G., BARBA, W. P. and GOLDNER, M. M. Hyposmotic fluid formation in *Hydra* 11

BERGQUIST, P. R., GREEN, C. R., SINCLAIR, M. E. and SILYN-ROBERTS, H. The morphology of cilia in sponge larvae 179

BLOODGOOD, R. A. The squid accessory nidamental gland: ultrastructure and association with bacteria 197

BORG, T. K. and BELL, R. A. Ultrastructure of the neurosecretory cells in the brain of diapausing pupae of the tobacco hornworm, *Manduca sexta* (L) 567

BORG, T. K. and GRANGER, N. A. Ultrastructure of the protocerebral neurosecretory cells of larval *Galleria mellonella*, *in situ* and after culture of the brain *in vitro* 645

BURGUET, S. *See* RUSSELL and BURGUET 751

C

CAHIL, M. C. *See* TICE, CARTER and CAHIL 395

CANTINI, M. *See* SCHIAFFINO, CANTINI and SARTORE 437

CARTER, R. S. *See* TICE, CARTER and CAHIL 395

CHANG, R. S. L., POTTER, L. T. and SMITH, D. S. Postsynaptic membranes in the electric tissue of *Narcine*: IV. Isolation and characterization of the nicotinic receptor protein 623

CHENG, M. *See* WILSON, HIRABAYSHI and CHENG 273

CHEVONE, B. I. and RICHARDS, A. G. Ultrastructural changes in intersegmental cuticle during rotation of the terminal abdominal segments in a mosquito 241

COBB, J. L. S. and PENTREATH, V. W. Anatomical studies of simple invertebrate synapses utilizing stage rotation electron microscopy and densitometry 125

CULLEN, M. J. and WEBSTER, H. deF. The effects of low temperature on myelin formation in optic nerves of *Xenopus* tadpoles 1

CUPRAK, L. J., LAMMI, C. J. and BAYER, R. C. Scanning electron microscopy of induced cell rounding of mouse adrenal cortex tumor cells in culture 667

D

DALLAI, R. *See* BACCETTI and DALLAI 563

DENTLER, W. L. Fine structural localization of phosphatases in cilia and basal bodies of *Tetrahymena pyriformis* 209

DESSER, S. S. and WELLER, I. Ultrastructural observations on the body wall of the leech, *Batracobdella picta* 35

E

EARLE, E. D. *See* ALDRICH, GRACEN, YORK, EARLE and YODER 167

F

FAHRENBACH, W. H. The brain of the horseshoe crab (*Limulus polyphemus*). II. Architecture of the corpora pedunculata 157

FAHRENBACH, W. H. *See* GRIFFIN and FAHRENBACH 745

FISCHMAN, D. A. *See* NAG, FISCHMAN, AUMONT and ZAK 419

FREHN, J. L. *See* BARRATT, NADAKAVUKAREN and FREHN 335
FRIBERG, U. *See* MOSKALEWSKI, THYBERG, HINEK and FRIBERG 185

INDEX OF SUBJECTS VOLUME 9

A

Abdominal paraganglia, in dog, 447
Adrenal cortex of mouse, tumor cells in culture, 667
Amphipod, *Phronima*, fine structure of compound eyes of, 521
Annelid, leech, *Batracobdella picta*, body wall of, 35
Antibodies, distribution of, to the troponin complex in chicken skeletal muscle determined by immunoelectron microscopy, 273
Articular chondrocytes, of rabbit, in tissue culture, 575
Avian hepatocytes, membrane systems of, during chronic exposure to dantrolene sodium: a morphometric, ultrastructural and histochemical study, 507
— muscular dystrophy, effect of, on reaction of troponin-C with its antibody, 499

B

Bacteria, association of squid accessory nidamental gland with, 197
Basal bodies, of *Tetrahymena pyriformis*, localization of phosphatases in, 209
Bismuth, staining for light and electron microscopy, 347
Bivalve mollusc, *Spisula solidissima*, ultrastructural study of peripheral neurons and associated non-neural structures in, 233
Body wall, ultrastructural observations of, in the leech *Batracobdella picta*, 35
Brain, of diapausing pupae of *Manduca sexta* L., ultrastructure of neurosecretory cells in, 567
—, of the horseshoe crab (*Limulus polyphemus*), II. Corpora pedunculata, 157
—, of *Rhodnius prolixus*, changes induced by activation in neurosecretory cells, with special reference to the role of lysosomes,

C

Caecum, posterior midgut, in *Pachygrapsus crassipes*, 681
Calcium ion concentration, influence on cellular viability, in isolated adult rat heart cells, 419
Calf serum components, localization of, in human fibroblast cultures, 317
Cartilaginous cells, *in vitro*, fine structure of Golgi complex during mitosis in, 185
Cation, transport capacity of larval lepidopteran midgut of, 255
Chicken, distribution of antibodies to the troponin complex in skeletal muscle of, 273
Chondrocytes, articular, of rabbit, in tissue culture, 575
Chromaffin tissue, extra-adrenal, in dog, anatomical distribution and morphology of, 447
Cilia, in sponge larvae, morphology of, 179
—, of *Tetrahymena pyriformis*, localization of phosphatases in, 209
Compound eyes, in Australian earwig, light- and dark-adapted, structural changes in, 653
— —, of the midwater amphipod *Phronima*, fine structure of in relation to behavior and habitat, 521
Concretions, origin, structure, composition and age-dependence of, in adult housefly midgut epithelium, 87
Corn roots, and protoplasts, effects of *Helminthosporium maydis* Race T toxin on mitochondria of, 167
Corpora pedunculata, architecture of, in the horseshoe crab (*Limulus polyphemus*), 157
Crayfish, *Orconectes virilis*, junctional complexes at sites of contact of hemocytes with tissue elements in degenerating nerves of, 43
Cuticle, intersegmental, in mosquito, ultrastructural changes in, during rotation of terminal abdominal segments, 241
Cytodifferentiation, in the accessory gland of *Tenebrio molitor*. II. Fine structure of the spermathecal accessory gland in the pupa, 711

D

Dantrolene sodium, exposure to of avian hepatocytes, 507
Dendritic spine, synaptic spinule in, 461
Densitometry, in studies of invertebrate synapses, 125
Dentate Gyrus, hippocampal, EM study of, 461
Diapausing pupae, of the tobacco hornworm, neurosecretory cells in the brain of, 567
Digestive system, concretions in *Musca domestica* midgut epithelium, 87
— —, extracellular protein associated with luminal surface of *Haemonchus contortus* intestinal cells, 23
— —, midgut ultrastructure of *Culex tarsalis*, 103
— —, posterior midgut caecum of *Pachygrapsus crassipes*, 681
— —, short circuit decay profile and cation transport of larval lepidopteran midgut *in vitro* and *in vivo*, 255

Dog, anatomical distribution and morphology of extra-adrenal chromaffin tissue (Abdominal paraganglia) in, 447
—, crystalloid inclusions in epididymis of, 733

E

Egg capsule, of the gastropod *Buccinum undatum* L, reducing group activity in structural protein ribbon of, 119
Electric tissue, of *Narcine*, postsynaptic membranes in, I. Fine structure of nicotinic receptor-channel molecules, 585
— —, — —, — — —, II. freeze fracture study of nicotinic receptor molecules, 595
— —, — —, — — —, III. Isolation and characterization, 609
— —, — —, — — —, IV. Isolation and characterization of nicotinic receptor protein, 623
Epididymis, in dog and rat, crystalloid inclusions in, 733
Epithelium, midgut, in adult *Musca domestica*, dense bodies (concretions) in, 87
Extra-adrenal chromaffin tissue (Abdominal paraganglia), in dog, anatomical distribution and morphology of, 447
Eyes, compound, in Australian earwig, light- and dark-adapted, structural changes in, 653
—, —, of *Phronima*, fine structure of, 521

F

Ferrocyanide–osmium fixation, of Leydig cells, 751
Fibroblast, human, in culture, 317
Fixation of Leydig cells by ferrocyanide–osmium mixture, 751
Freeze fracture, observations on tight junctions in fetal rat thyroid 395
— —, of nicotinic receptor molecules in postsynaptic membranes of *Narcine*, 595

G

Gap junctions, structural diversity of, 373
Gastropod mollusc, *Buccinum undatum* L., egg capsule of, 119
Germ cells, of rat testis, sertoli ectoplasmic specializations in their association with, 475
Gill, in horseshoe, crab, receptor arrays in, 745
Gland, pineal, of golden hamster, effects of melatonin implants on, 335
—, spermathecal accessory, in *Tenebrio molitor*, 711
—, squid accessory nidamental, 197
Golgi complex, fine structure of, during mitosis of cartilaginous cells *in vitro*, 185
Growth, logarithmic and confluent stages of, the rabbit articular chondrocytes in tissue culture, 575
Gyrus, hippocampal dentate, EM study of, 461

H

Hamster, golden, effect of melatonin implants on gonadal weights and pineal gland fine structure of, 335
Heart cells, isolated, of adult rat: surface morphology and influence of extracellular calcium ion concentration on cellular viability, 419
Helminthosporium maydis Race T toxin, ultrastructural effects of, on mitochondria of corn roots and protoplasts, 167
Hemocytes, formation of junctional complexes at sites of contact of, with tissue elements in degenerating nerves of the crayfish, *Orconectes virilis*, 43
Hepatocytes, avian, membrane systems of, exposure of dantrolene sodium to, 507
Hippocampal dentate Gyrus, EM study of, 461
Horseshoe crab, (*Limulus polyphemus*), brain of, II. Architecture of the corpora pedunculata, 157
— —, — —, gill receptor arrays in, 745
Housefly, *Musca domestica*, concretions in midgut epithelium of, 87
Hydra, hyposmotic fluid formation in, 11
Hyposmotic fluid, formation of, in *Hydra*, 11

I

Immuno-electron microscopy, simplified method of, determination of antibodies to troponin complex by, 273
Inclusions, crystalloid, in dog and rat epididymis, ultrastructure of, 733
Innervation, of electric cells, in *Narcine*, 585
Insect, cockroach, *Periplaneta americana*, fine structure of the first optic ganglion of, 57
—, *Culex tarsalis* (Diptera: Culicidae), midgut ultrastructure of before and after a bloodmeal, 103
—, *Galleria mellonella*, *in vivo* cellular reactions of, ultrastructural analysis of nodule formation in, 73
—, — —, protocerebral neurosecretory cells of, 645
—, housefly, *Musca domestica*, concretions in midgut epithelium of 87
—, *Labidura riparia truncata* (Dermaptera), Australian earwig, structural changes in light- and dark-adapted compound eyes of, 653
—, larval lepidopteran, short circuit decay profile and cation transport capacity of midgut of, 255
—, mosquito, changes in intersegmental cuticle of, 241
—, *Rhodnius prolixus*, neurosecretory cells in the brain of, 547
—, *Tenebrio molitor*, spermathecal accessory gland in the pupa of, 711
—, termites (Isoptera), rectum of, 693
Intestinal cells, in *Haemonchus contortus*, extracellular protein associated with luminal surface of, 23

J

Junctional complex, gap junctions, structural diversity of, 373

— —, rat sertoli ectoplasmic specializations in their association with germ cells of rat testis, 475
— —, tight junctions in fetal rat thyroid, 395
— —es, formation of, at sites of contact of hemocytes with tissue elements in degenerating nerves of the crayfish, *Orconectes virilis*, 43

L

Leech, *Batracobdella picta*, body wall of, 35
Leydig cells, ultrastructure of, as revealed by secondary tissue treatment with a ferrocyanide–osmium mixture, 751
Localization, cell and fetal calf serum components in human fibroblast cultures, 317
—, phosphatases in cilia and basal bodies of *Tetrahymena pyriformis*, 209
—, reducing group activity in the structural protein ribbons of the egg capsule of the gastropod *Buccinum undatum* L., 119
Lung, extracted surfactant of, 301
—, mammalian, three-dimensional aspect of surfactant myelin figure of, 285
Lysosomes, in *Rhodnius prolixus*, brain, the role of, 547

M

Manduca sexta L., tobacco hornworm, neurosecretory cells in brain of diapausing pupae of, 567
Melatonin, effect of implants of on gonadal weights and pineal gland fine structure of the golden hamster, 335
Membrane systems, of avian hepatocytes, during exposure to dantrolene sodium, 507
Microtubules, in nutritive tubes, distribution and function of, 537
Midgut, *Culex tarsalis*, ultrastructure of, before and after a bloodmeal, 103
—, epithelium, of the adult housefly, *Musca domestica*, origin, structure, composition and age-dependence of mineralized dense bodies (concretions) of, 87
—, lepidopteran larva, origin of short circuit decay profile and maintenance of cation transport capacity of, 255
—, posterior, caecum of, in *Pachygrapsus crassipes*, low salinity adaptation of, 681
Mineralized dense bodies, (concretions), in *Musca domestica* midgut epithelium, 87
Mitochondria, of corn roots and protoplasts, ultrastructural effects of *Helminthosporium maydis* Race T toxin on, 167
Mitosis, in cartilaginous cells *in vitro*, fine structure of Golgi complex during, 185
Mollusc, bivalve, *Spisula solidissima*, ultrastructural study of peripheral neurons and non-neural structures in, 233
—, gastropod, *Buccinum undatum* L, localization of reducing group activity in the structural protein ribbons of the egg capsule of, 119
Mouse, adrenal cortex tumor cells of, 667
Multilamellar bodies, lung surfactant origin from, 301
Muscle, chicken skeletal, distribution of antibodies to troponin complex as determined by immunoelectron microscopy in, 273
—, developing locomotor, of the pelagic tunicate *Cyclosalpa affinis* (Thaliacea: Salpidae), fine structure of, 137
—, heart cells, isolated, of rat 419
—, skeletal, in rat, T-system formation of, 437
Muscular dystrophy, avian hereditary, effect of on reaction of troponin-C with its antibody, 499
Myelin figure, mammalian lung surfactant, three-dimensional aspect of, 285
— formation, effect of low temperature on, in optic nerves of *Xenopus* tadpoles, 1

N

Narcine, postsynaptic membranes in the electric tissue of, I. Fine structure of nicotinic receptor-channel molecules, 585
—, — — — — — — —, II. Freeze fracture study of nicotinic receptor molecules, 595
—, — — — — — — —, III. Isolation and characterization, 609
—, — — — — — — —, IV. Isolation and characterization of nicotinic receptor protein, 623
Nematode, *Haemonchus contortus*, extracellular protein associated with intestinal cells of, 23
Nervous system, brain of the horseshoe crab (*Limulus polyphemus*), II. Corpora pedunculata, 157
— —, degenerating nerves, formation of junctional complexes at sites of contact of hemocytes with tissue elements of, in the crayfish, *Orconectes virilis*, 43
— —, first optic ganglion of *Periplaneta americana*, 57
— —, invertebrate synapses, anatomical studies of, utilizing stage rotation electron microscopy and densitometry, 125
— —, neurosecretory cells in brain of, *Manduca sexta*, L., 567
— —, — — — — —, *Rhodnius prolixus*, 547
— —, peripheral neurons in the bivalve mollusc, *Spisula*, 233
— —, postsynaptic membranes in electric tissue of *Narcine*, I. EM study of nicotinic receptor-channel molecules, 585
— —, — — — — — — —, II. Freeze fracture study of nicotinic receptor molecules, 595
— —, — — — — — — —, III. Isolation and characterization, 609
— —, — — — — — — —, IV. Isolation and characterization of nicotinic receptor protein, 623
— —, protocerebral neurosecretory cells of larval *Galleria mellonella*, *in situ* and after culture of the brain *in vitro*, 645
— —, synaptic spinule in the dendritic spind: EM study of the hippocampal dentate Gyrus, 461
— —, *Xenopus* tadpoles optic nerves, effects of low temperature on myelin formation, 1

Neurosecretory cells, brain of *Rhodnius prolixus*, sequence of ultrastructural changes induced by activation of, 547
— —, protocerebral, of *Galleria mellonella*, 645
— —, ultrastructure of, in the brain of diapausing pupae of the tobacco hornworm, *Manduca sexta*, L., 567
Nicotinic receptor-channel molecules, of *Narcine* electric tissue, fine structure of, 585
— — molecules, in electric tissue of *Narcine*, freeze fracture study of, 595
— — protein, from electric tissue of *Narcine*, isolation and characterization of, 623
Nodule, ultrastructural analysis of formation of, in *Galleria mellonella*, 73
Nutritive tubes, distribution and function of microtubules in, 537

O

Onychophoran, *Peripatoides leuckarti*, spermatozoon of, 563
Optic ganglion, of the cockroach, *Periplaneta americana*, fine structure of, 57
— nerves, in *Xenopus* tadpoles, effect of low temperature on myelin formation in, 1
Organ culture, of brain of *Galleria mellonella*, 645

P

Phosphatases, fine structural localization of, in cilia and Basal bodies of *Tetrahymena pyriformis*, 209
Postsynaptic membranes, in electric tissue of *Narcine*, I. Fine structure of nicotinic receptor-channel molecules, 585
— —, — — — — —, II. Freeze fracture study of nicotinic receptor molecules, 595
— —, — — — — —, III. Isolation and characterization, 609
— —, — — — — —, IV. Isolation and characterization of nicotinic receptor protein, 623
Protein ribbons, egg capsule of the gastropod *Buccinum undatum* L., localization of reducing group activity in, 119
Protocerebral neurosecretory cells, of *Galleria mellonella*, 645
Protoplasts, and corn roots, effects of *Helminthosporium maydis* Race T toxin on mitochondria of, 167
Pupa, of *Tenebrio molitor*, fine structure of spermathecal accessory gland in, 711
Pupae, diapausing, of the tobacco hornworm, neurosecretory cells in the brain of, 567

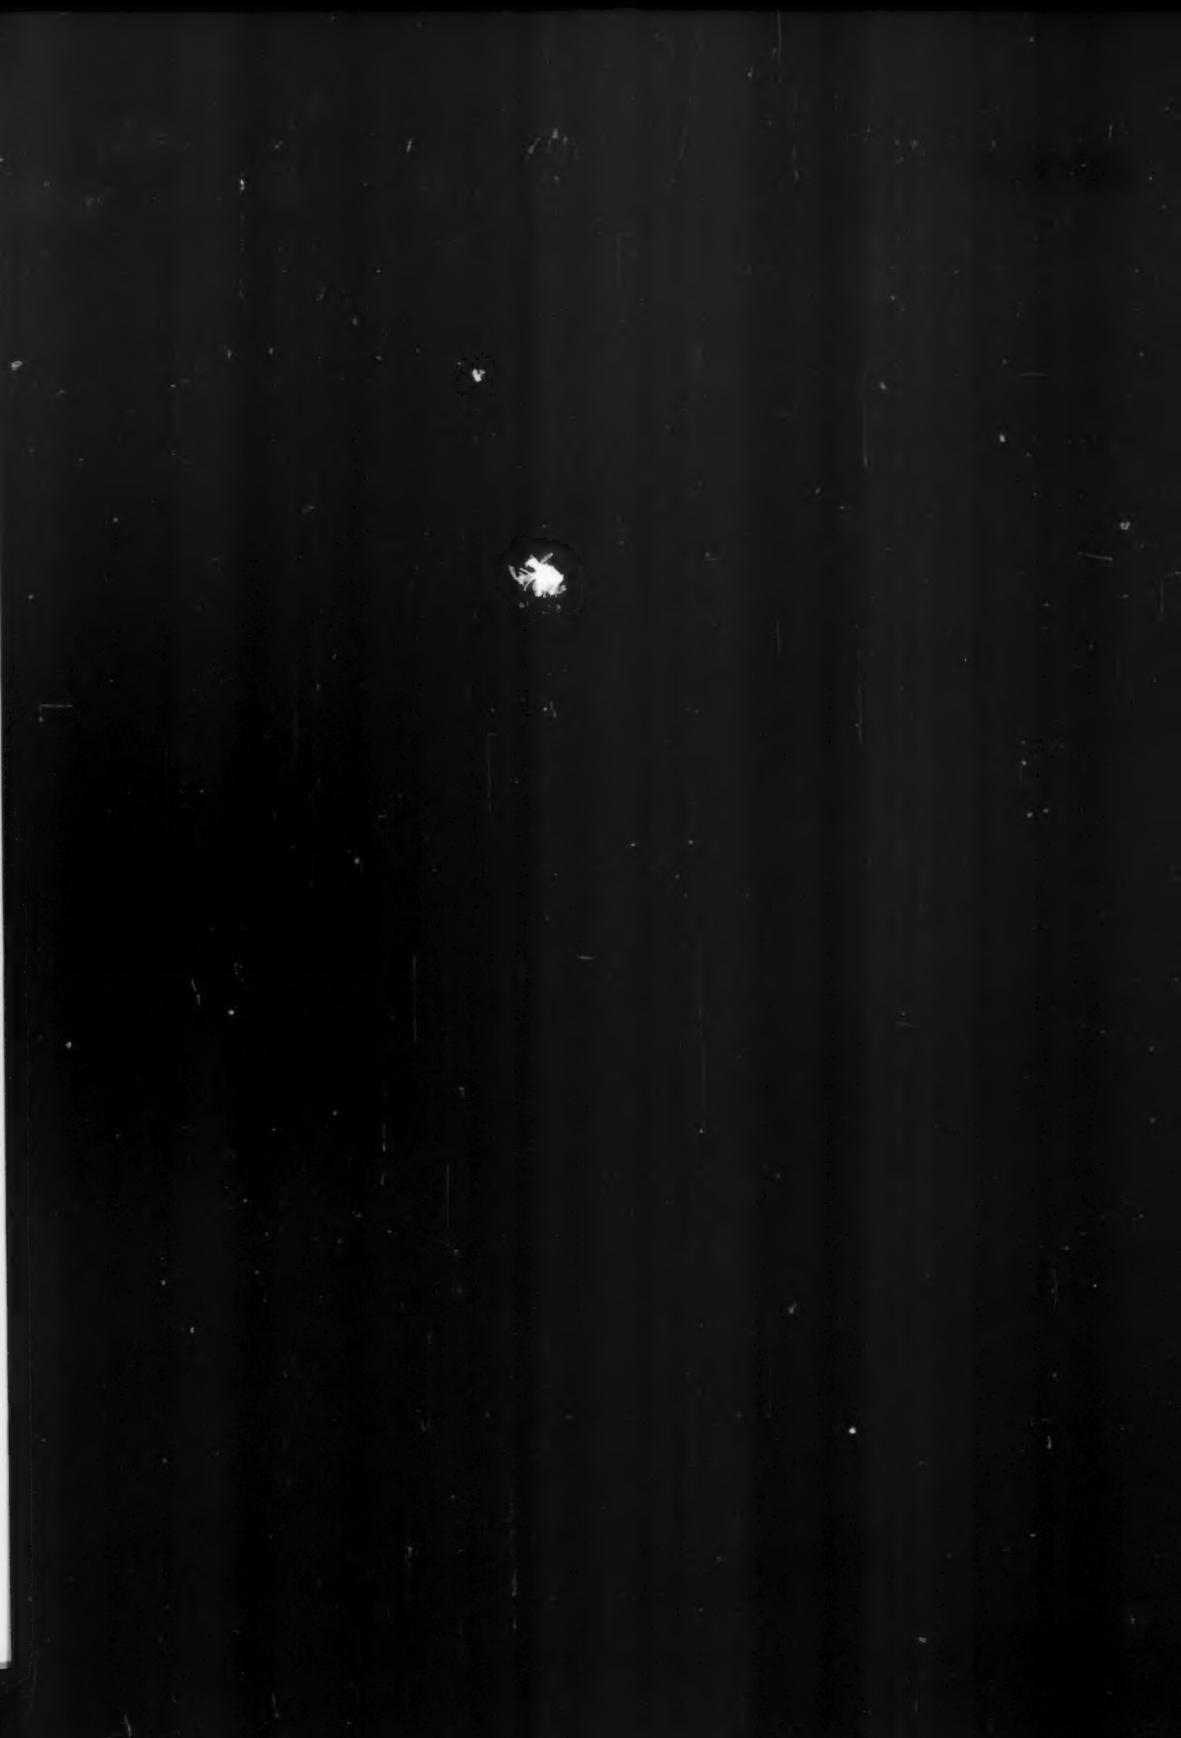
R

Rabbit, fine structure of articular chondrocytes of, 575
Rat, crystalloid inclusions in epididymis of, 773
—, fetal, developing tight junctions in thyroid of, 395
—, isolated heart cells of, 419
—, sertoli ectoplasmic specializations in their association with germ cells of testis of, 475
—, T-system formation in cultured skeletal muscle of, 437
Receptor arrays, in gill, in the horseshoe crab, 745
— channel molecules, nicotinic, in electric tissue of *Narcine*, fine structure of, 585
— molecules, nicotinic, in electric tissue of *Narcine*, freeze fracture study of, 595
— protein, nicotinic, from electric tissue of *Narcine*, isolation and characterization of, 623
Reproductive system, effect of melatonin implants on gonadal weights of the golden hamster, 335
— —, egg capsule of *Buccinum undatum*, L., 119
— —, rat sertoli ectoplasmic specializations in their association with germ cells of rat testis, 475
— —, spermathecal accessory gland in the pupa of *Tenebrio molitor*, 711
— —, spermatozoon of onychophoran, *Perpatoides leuckarti*, 563
— —, ultrastructure of crystalloid inclusions in dog and rat epididymis, 733
— —, ultrastructure of Leydig cells, 751

S

Salinity, low, adaptation to of posterior midgut caecum of *Pachygrapsus crassipes*, 575
SEM, of induced cell rounding of mouse adrenal cortex tumor cells in culture, 667
Sertoli cells, rat, junctional specializations of, 475
Sodium, dantrolene, exposure to of avian hepatocytes, 507
Spermathecal accessory gland, in the pupa of *Tenebrio molitor*, cytodifferentiation in, 711
Spermatozoon, of onychophoran, 563
Spine, dendritic, synaptic spinule in, 461
Spinule, synaptic, in the dendritic spine: EM study of the hippocampal dentate Gyrus, 461
Sponge larvae, the morphology of cilia in, 179
Squid, ultrastructure and association with bacteria in accessory nidamental gland of, 197
Stage rotation electron microscopy, in studies of invertebrate synapses, 125
Staining, with bismuth, for light and electron microscopy, 347
Surfactant, lung, periodicity and architecture of lipid retained and extracted, origin from multilamellar bodies of, 301
—, myelin figure, of mammalian lung, 285

T

Tadpoles, *Xenopus*, effects of low temperature on myelin formation in optic nerves of, 1
Temperature, low, effects of in myelin formation in optic nerves of *Xenopus* tadpoles, 1
Termites, fine structure of the rectum of, a comparative study, 693


Testis, of rat, sertoli ectoplasmic specializations in their association with germ cells of, 475
Tetrahymena pyriformis, localization of phosphatases in cilia and Basal bodies of, 209
Thyroid, in fetal rat, tracer and freeze fracture observations on developing tight junctions in, 395
Tight junctions, developing, tracer and freeze-fracture observations on, in fetal rat thyroid, 395
Tissue culture, human fibroblasts, nature of substrate-attached materials in; localization of cell and fetal calf serum components, 317
— —, mouse adrenal cortex tumor cells, 667
— —, rabbit articular chondrocytes, during logarithmic and confluent stages of growth, 575
— —, rat skeletal muscle, 437
Tobacco hornworm, *Manduca sexta* L., neurosecretory cells in brain of diapausing pupae of, 567
Toxin, *Helminthosporium maydis* Race T, effect on mitochondria of corn roots and protoplasts of, 167
Tracer, observations on tight junctions in fetal rat thyroid, 395
Troponin complex, troponin-C and troponin-I, distribution of antibodies to, in chicken skeletal muscle, 273
— C, reaction of with its antibody, effect of on avian hereditary muscular dystrophy, 499
T-system, formation of, in cultured rat skeletal muscle, 437
Tumor cells, of mouse adrenal cortex, 667
Tunicate, *Cyclosalpa affinis* (Thaliacea: Salpidae), fine structure of developing locomotor muscles of, 137
